**R-GUN-MULTI**

Our original application dedicated to engineers and designers. This simple, yet multifunctional tool enables you to run calculations and develop designs using Rawlplug.

**TOOLS FOR DESIGNERS**

Our original application dedicated to engineers and designers. This simple, yet multifunctional tool enables you to run calculations and develop designs using Rawlplug.

**FEATURES AND BENEFITS**

- Perfect for professional applications
- Robust and durable design for all kinds of working conditions
- Quick and easy resin dispensing
- One extruder for almost all kinds of cartridges
- Convenient to use
- Blue-coloured
- Excellent for professionals
- Durable structure meets the high requirements for the construction site
- Offering a long service life
- Highly resistant to tough jobsite conditions
- Well balanced for better handling

**RELATED PRODUCTS**

- **R-KER II**
  - 300ml, 400ml
  - Hybrid resin and versatile application in cracked and non-cracked concrete with threaded nuts. Designed for various applications.

- **R-KER-II**
  - 300ml, 400ml
  - Premium pure epoxy resin approved for use in cracked and non-cracked concrete applications.

- **R-KEM-II**
  - 175ml, 300ml, 410ml
  - Universal polyester (styrene free) resin - European Approval For 15 substrates.

- **R-KF2**
  - 380ml, 400ml
  - Economical polyester resin for medium duty load applications.

**PROFESSIONAL DISPENSER**

Perfect for professional applications. **MULTIGUN** works with virtually all types of cartridges of any capacity.

One dispenser for almost all types of cartridges

UNIQUE

The MULTIGUN is a unique resin dispenser, because it is compatible with all our cartridges. It seems to be popular with both our existing and potential customers. The MULTIGUN replaces 3 other dispensers, which makes it a more cost-effective solution for the Customer. On top of that, the MULTIGUN works with all kinds of cartridges and all volumes, which is indicated in the enclosed instructions on the preparation for work with the gun. RAWLPLUG® MULTIGUN works with three types of cartridges:

- side-by-side cartridges
- coaxial cartridges
- cartridges with foil loads

UNIVERSAL DISPENSER

For the following cartridges:

- 175ml (e.g. R-KEM-II-175)
- 300ml (e.g. R-KEM-II-300)
- 380-410ml (e.g. R-KER-II-400)
- 385,600ml (e.g. R-KEX-II, R-KEX-600)

One gun that you can use for many types of cartridges and package capacities. For all types of resins:

- polyester
- vinylester
- hybrid
- epoxy
- for different products: acrylic, sealants, adhesives.

EFFECTIVE AND ECONOMICAL

Replaces three other dispensers which makes the RAWLPLUG® MULTIGUN offer the most economical solution available for resin dosing. Plus, the gun settings system is quick and easy.

MULTIGUN

Works with virtually all types of cartridges of every capacity. MULTIGUN is an economical device that replaces three other guns.

The choice of the dispenser is decided by three parameters: dosing method, type of packaging of the resin and its capacity.

MULTIGUN works with cartridges such as:

- side-by-side
- coaxial type cartridges
- cartridge with a foil load

One dispenser for almost all types of cartridges for resins, acrylics, silicone adhesives and sealants

A massive piston that presses evenly on the resin and works well in balancing the whole device

Robust and durable construction in all conditions of work

A well-fitted trigger with smooth mechanism ensures stability and repeatability of the extruded resin

Solid latch preventing withdrawal and efficient relaxation of the piston

UNIQUE
